# Marshall's MATCHLESS HARDY LILIES

Among the stateliest of all hardy plants, Lilies, during their respective flowering seasons, constitute the chief attraction in the hardy border. They prefer a well drained soil, and should remain undisturbed for years. In the autumn give the bulbs a heavy mulching of leaves; coarse manure or straw will prove highly beneficial.

## *Marshall's* DUROGREEN *Lawn Grass*

Marshall's Durogreen Lawn Grass Mixture produces a perfect as well as permanent lawn of luxuriant richness. It quickly forms a closely interwoven, firm and elastic turf ready for cutting in about six weeks from time of sowing. This is a scientifically blended mixture, containing only the highest grade of recleaned seeds.

## *Marshall's* MATCHLESS *Lawn Grass*

Marshall's Matchless Lawn Grass Mixture still maintains a high place in the esteem of those who desire an even, dense growth of permanent sward very early in the season. It is composed of only the best recleaned seeds, containing Kentucky Blue, Fancy Red Top, Fescue, Perennial Rye, and a small quantity of White Clover, all blended to warrant perfect results.

1 lb. will sow a plot 15 x 15 ft., 5 lbs. a plot 25 x 40 ft., (1000 sq. ft.), 200 lbs. 1 acre (43,560 sq. ft.)

Price: Lb., 75c; 5 lbs., \$3.50; 25 lbs., \$17.00; 100 lbs., \$65.00.

## *Marshall's* SHADY PLACE *Lawn Grass*

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful grass. The grasses used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a greensward was desired on land partially shaded by old trees.

Price: Lb., \$1.00; 5 lbs., \$4.75; 25 lbs., \$23.00; 100 lbs., \$90.00.

## Grasses for Hay and Permanent Pasture

### Permanent Pasture

All the grasses used in this mixture are permanent when once established and varieties have been used that will give a lasting close turf throughout the entire season. Please specify whether for light, medium or heavy soils.

Price: 10 lbs., \$7.00; 100 lbs., \$60.00.

### Permanent Hay

This mixture is made up of the right varieties of permanent grasses which will yield profitable returns for many years. An occasional top dressing of manure or fertilizer will assure an abundant crop. We recommend sowing 50 lbs. to the acre.

Price: 10 lbs., \$7.00; 100 lbs., \$60.00.

## INDIVIDUAL GRASS SEED For Other Purposes

**Bent, Cocos or Seaside.** A hardy creeping variety with fine texture and a beautiful dark green color. It has fine turf producing qualities for putting greens or lawns. Lb., \$2.00; 25 lbs., \$43.75.

**Blue Grass, Kentucky** (*Poa Pratensis*). One of the most valuable native grasses for lawns and pastures. Succeeds well on all good soils. Weight per bu., 20 lbs. Lb., \$1.00; 25 lbs., \$23.50.

**Fescue, Chewing's Domestic.** Adapted to practically all conditions, making a fine compact turf of dark green color and resistant to hard wear. Short crop. Lb., \$1.60; 25 lbs., \$37.50.

**Orchard Grass.** A good grass for hay crop, yielding nearly the same amount as Timothy and almost equal in feeding value. Orchard Grass will grow on almost every soil. One of the best grasses for sowing in shady places and among fruit trees in orchards. 35 to 40 lbs. required for one acre. Weight per bu., 14 lbs. Lb., 85c; 25 lbs., \$19.00.

**Red Top, Fancy Cleaned** (*Agrostis Vulgaris*). A highly recommended grass for permanent pasture and as meadow grass for hay. Red Top is especially valuable for sour and acid soils, and meadow lands. Red Top makes one of the best grasses for lawn use, either sown alone or in connection with White

Clover or in mixture with other grasses. Weight per bu., 30 lbs. Lb., 55c; 25 lbs., \$11.50.

**Rough Blue Grass** (*Poa Trivalis*). A spreading, stoloniferous-rooted grass. Adapted for shady places. Lb., \$1.20; 25 lbs., \$27.50.

**Rye Grass, Domestic.** A mixture of English and Italian Rye Grasses, grown in the United States, and used for a nurse for lawn grasses and where immediate results are wanted. Extensively used in the South for turf. Lb., 35c; 25 lbs., \$7.00.

**Rye Grass, Perennial!** Produces a strong growth in four or five weeks after sowing. It cures into a hay that is rather hard, but having a sweet flavor and much relished by cattle and horses. Lb., 55c; 25 lbs., \$12.50.

**Timothy or Herd Grass** (*Phleum Pratense*). The standard hay of commerce. The excellent quality of the hay and the ease of culture makes it valuable. It is adapted to moist soils, but succeeds best on moist loam and clay. Timothy sown alone requires about 20 lbs. per acre; when sown with red Clover use 15 lbs. Timothy and 5 lbs. red Clover. Weight per bu., 45 lbs. Market price.

**White Clover** (*Trifolium Repens*). Valuable for lawns as it forms a very close and green texture. On sandy, dry soils it is very satisfactory. It is also valuable in pastures. Quantity per acre, 10 lbs. Lb., \$2.00; 10 lbs., \$19.00.

**Wild White Clover.** An English variety that is more spreading and will grow on poorer soils than other varieties. It is permanent after once having been sown in lawns or pastures. About one pound per acre when used with other seeds. Lb., \$2.50; 10 lbs., \$23.00.
